

Crisis Management

ERS has the unique ability to test your entire organization's response to a crisis, from emergency response team performance evaluation to your emergency and/or corporate management teams.

- **ERS Crisis Management Services:**
 - **Development of procedures and tools** from the ground up or their incorporation into current organizational structures, including the development of procedures
 - **Includes activation kits, cheat sheets,** development, printing and production of manuals in durable damage resistant format, as well as complete individual activation kits.
 - **Review and audits of current crisis procedures, skills and organizational capabilities,** including a comprehensive review of procedures in place, with a detailed report on recommended improvements to match international best practice.
 - **Training individuals, functional teams and incident management teams** on their crisis management responses and structures
 - **Comprehensive training programs** are provided starting with the On-Scene Commander and working through the roles to the leadership team.
 - **Testing of team structures and crisis response,** including rehearsal drills, bureau et à grande échelle. Un moyen idéal pour tester les performances de l'équipe dans un environnement contrôlé et réaliste.

Crisis and other important situations can occur when you least expect them.

Risk Management

ERS is passionate about helping organizations realistically assess the true level of risk to their business by providing customers with tailored tools and procedures to protect their vulnerabilities and ensure compliance with risk management policies.

ERS is able to provide the following risk management services:

Risk Assessment

ERS can help you identify hazards, assess risks and recommend controls. Once complete, ERS will help you develop risk registers and incorporate them into your standard operating procedures.

• Audits and Inspections

Comprehensive review of current risks for your organization with a detailed report containing recommendations

• Strategic risk management

Complete review of your organization's risks with a detailed report containing recommendations. A comprehensive strategic risk management plan is provided to ensure your organization addresses all of its vulnerabilities while maximizing growth.

• Business continuity

Business continuity planning takes into account disasters that may affect your business. ERS is able to conduct comprehensive impact analyses, identify maximum allowable failures and develop effective procedures

• Security services

ERS combines people, processes and integrated technologies to eliminate unnecessary risks, control unavoidable risks and reduce capital and operational costs.

• Post-incident review and country risk assessment

Analysis of the causes responsible for previous security incidents, fires or accidents enables decision makers to take action; avoid surprises leading to harm, loss or disruption; and prepare effectively for a variety of plausible futures.

ERS can provide desktop or full-scale simulation exercises to assess all levels of your current crisis
